A Renewable Source Product
Protecting the Future

PLANET EARTH PAPER SOLUTIONS INTRODUCES THE LATEST ADVANCEMENT IN ECO-FRIENDLY PAPER PRODUCTS!!!!

"Sustainable" Paper Alternative for Today !

What are Sugar Cane Paper Products?

Sugar cane fibers (known as bagasse) that are left over from the process of making table sugar that were previously burned, releasing clouds of smoke into the atmosphere. Now bagasse is transformed into pulp to make the most environmentally friendly paper products available today. The process of making paper out of sugar cane pulp is virtually pollution free.

Why "PLANET EARTH PAPER SOLUTIONS"?

- **A**bsolutely no forests are destroyed in the making of our restroom paper products. These products are completely **tree free paper.**
- **S**ugar cane paper is **Elemental Chlorine Free (ECF).** Chlorine containing compounds used in bleaching some wood based products release toxic by products (dioxins) into the environment.
- **M**ade from sugar cane fibers, our 100% biodegradable, compostable and fully recyclable. These paper products have the appearance of clean, bright white virgin products, yet are a "**greener"** option to **recycled wood fiber** products.
- **I**f you are working towards your **USGBC LEED Certification**, using sugar cane paper products in your restrooms is a great way to help towards your qualifications. By providing sugar cane paper products you will receive **5 LEED points**. This move alone will help you achieve 15% of your goal, while providing your tenants with superior quality products.
- **B**y using this sugar cane, tree free paper, you convert what would otherwise become another greenhouse gas air-pollutant (crops are regularly burned in the fields), to a forest-preserving, useful paper products.
- **S**ugar cane paper products are an **annually renewable paper source**. Sugar cane renews itself in one (1) year or less. The trees used in making traditional wood based paper take anywhere from 9-25 years to renew.
- **You are supporting a paradigm shift away from the destruction of our natural forest ecosystems for paper.**
